

6. Electronic Lock RFID ISO ST – Label Location

Label location is on the »Door RFID Antenna because:

- The »Electronic Lock RFID ISO ST« is OEM product for Locker Manufacturers and not for the final customer.
- At the time of delivery the Label is clearly visible.
- Locker manufacturer integrates our product »Electronic Lock RFID ISO ST« into his final product and is responsible for proper labelling of the final product.
- In the document »Electronic Lock RFID ISO ST Technical Manual« there is paragraph describing final product labelling that urges our customer to put on his Product Label also statement »Contains FCC ID: 2ABT8003P1142«.
